

**Emergency resilience container pods.**

## **Project Resilience**

Emergency preparedness and disaster resilience has become a critical concern for New Zealand communities and organisations in recent times. The significant increase in frequency and intensity of natural disasters has highlighted the need for effective emergency response strategies. Here at EPOD, we are proud to offer an innovative and practical solution to address such need.

## **Our EPODs**

Built to withstand New Zealand's toughest conditions, our purpose built fully customisable emergency container pods are designed to be placed in high-risk environments prone to the effects of natural disasters such as flood and landslide zones, coastal and rural areas and earthquake regions. Our EPODs are designed to provide a critical lifeline to distressed communities and can be fully customised to include the latest emergency equipment such as critical infrastructure and tools, generators, satellite devices, water filtration systems, medical kits, food stocks and other necessary supplies.

When it comes to emergency preparedness, we understand that not one size fits all. That is why our team of experts work closely with our clients to ensure that their EPODs are designed to meet their specific needs and requirements. Made from high-quality durable materials that are built to last, our EPODs are also designed to be easily transportable and can quickly be deployed to at risk environments.

We are proud to share that our EPODs were recently put to the test, having been utilised in the emergency response efforts to Cyclone Gabrielle. In January 2023, prior to the arrival of Cyclone Gabrielle, we successfully delivered 25 EPODs to our client Te Whare Maire o Tapuwae Whanau Ora, which were deployed across the wider Wairoa region. Having been one of the worst affected regions in New Zealand, our EPODs made a positive impact and proved to be a critical lifeline to the Wairoa community in their emergency response and resilience efforts to Cyclone Gabrielle.

Our partnership with Hawkes Bay based global sportswear and manufacturing company Kooga New Zealand ensures that we have the necessary expertise and resources to deliver and implement our clients' needs. As part of the Kooga family, we have access to a wealth of experience and expertise in product manufacturing and sourcing, which enables us to offer our clients premium products at competitive prices.

We believe that our innovative solution to emergency preparedness and resilience will save lives and continue to positively impact communities and future emergency responses. We have made it our mission to empower vulnerable communities with the necessary tools and resources required to protect themselves during future natural disaster events. We are committed to providing our clients with the best possible service and products, and our team of experts will work with you closely throughout the process to ensure that your EPOD meets your exact requirements.

If you are interested in working with us or want to deploy EPODs in your community, please do not hesitate to reach out and one of our friendly staff will be in touch with you shortly.
